

```
                                = {  
    fname:    'John',  
    lname    'Doe'  
};
```

Property flattening

Property flattening

```
const person$fname = 'John'
```

```
const person$lname = 'Doe'
```

```
function fullName(p) {  
  return p.fname + ' ' + p.lname;  
}
```

```
console.log(person$fname + ' '  
             + person$lname);
```

Constants folding

```
const person$fname = 'John';  
const person$lname = 'Doe';
```

```
function fullName(p) {  
    return p.fname + ' ' + p.lname;  
}
```

```
console.log(person$fname + ' '  
            + person$lname);
```
